Re: Thermalito Water & Sewer District's Proposed 2021 Water Transfer

Dear Customers and Interested Members of the Public:

Today the State Water Resources Control Board published a Notice of Petition for Temporary Change in water right terms requested by TWSD. If approved by the State Water Board, the Petition would allow for the temporary (2021 only) transfer of up to 3,500 acre-feet of water to Santa Clara Valley Water District. The transfer of this water would not impact any of TWSD's other obligations, including ongoing water deliveries to customers.

California is currently experiencing extreme dry hydrologic conditions, with 2021 the driest year on record since 1977. This extreme dry year follows dry conditions in 2020. On April 21, 2021 Governor Newsom proclaimed a state of emergency in Mendocino and Sonoma Counties due to drought conditions in those counties. On May 10, 2021 Governor Newsom extended the state of emergency to include 41 counties, including Butte County and Santa Clara County, the location of the water transfer purchaser, Santa Clara Valley Water District. Also included in Governor Newsom's May 10th emergency proclamation is an order to the State Water Board to expeditiously consider requests to move water via voluntary water transfers. TWSD's proposed transfer falls under this language in the proclamation.

TWSD is fortunate, despite extreme dry conditions, to have adequate water supplies currently in storage to meet all customer demands and other obligations, while also providing essential water transfer supplies to Santa Clara Valley Water District. The proposed transfer to Santa Clara Valley Water District will not impact ongoing water deliveries. Also, TWSD has analyzed the proposed transfer and concluded there are no other impacts from the proposed transfer, including unreasonable impacts to fish and wildlife and impacts to other legal users of water.

Additional information about TWSD's petition is available at the State Water Board's website at www.waterboards.ca.gov or by contacting Christopher Heindell, District Engineer at cheindell@twsd.info.

Any interested members of the public may file comments regarding TWSD's Petition. Comments should be submitted to the persons listed below and must be received by 4:30 p.m. on June 21, 2021:
